View your basic network information and set up connections

View your active networks
You are currently not connected to any networks.

Change your networking settings

Set up a new connection or network:
Set up a wireless, broadband, dial-up, ad hoc, or VPN connection; or set up a router or access point.

Connect to a network
Connect or reconnect to a wireless, wired, dial-up, or VPN network connection.

Choose homegroup and sharing options
Access files and printers located on other network computers, or change sharing settings.

Troubleshoot problems
Diagnose and repair network problems, or get troubleshooting information.
Manually create a network profile

Enter information for the wireless network you want to add:

- **Network name**: CMP1
- **Security type**: WPA2-Enterprise
- **Encryption type**: AES

Additional settings:
- **Start this connection automatically**
- **Connect even if the network is not broadcasting**

**Warning**: If you select this option, your computer's privacy might be at risk.
Change connection settings

Managing wireless networks that use (Wireless Network Connection)

Windows tries to connect to these networks in the order listed below.

Add Adapter properties Profile types Network and Sharing
 Networks you can view, modify, and render (2)

- CMP1
- DLINK_WIRELESS

Manually connect to a wireless network

Successfully added CMP1

Change connection settings
Open the connection properties so that I can change the settings.
